-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Phillips.

Phillips, in figures 7-11, discloses a pivotal baffle (50) having a first position perpendicular to the flow and a second position parallel to the flow, with a second plate (62) acting as a torque limiting counterweight, as claimed.

3. Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Turner Jr. et al.

Turner discloses a pivotal baffle (screen 102) having a first position perpendicular to the flow and a second position parallel to the flow, with a shear ring (105) acting as a torque limiter, as claimed. Note that, according to Webster's Collegiate Dictionary, a baffle may be a screen.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Olson or Martinez.

Olson and Martinez each disclose a pivotal baffle in the form of a screen having a first position perpendicular to the flow and a second position parallel to the flow, with a spring acting as a torque limiter, as claimed. Note that, according to Webster's Collegiate Dictionary, a baffle may be a screen.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Bonneau or Sass.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Use.

Bonneau, Sass and Use each disclose a pivotal baffle in the form of a screen having a first position perpendicular to the flow and a second position parallel to the flow, as claimed (in Use, see figure 10E).

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Other references of interest include Rush, Moore, Allen, Woodall and Lee.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Upton whose telephone number is

571-272-1169. The examiner can normally be reached on 7:30-5:00, off every other Monday.
